Eng. Leonardo Nibbi: his experience in the renewable energy and sustainability field since 1999 is mainly devoted to:

the logistic of the biomass to energy chain, with particular attention to the use of GIS tools for correct planning;

sustainability of solid, gaseous and liquid biofuels;

market and legislation for solid biofuel;

micrositing and assessment of wind farms through the use of WASP;

grid integration of renewable energy sources, energy storage;

Education and Training in the Renewable Energies Field, with particular attention to Bioenergy and Wind Energy.

He took part in several EU R&D and dissemination projects, mainly in the Bioenergy field:

"Opportunities for Biomass to Energy Projects in La Rioja (Spain) and Tuscany (Italy)" ALTENER PILOT PROJECTS 1998 ;
